Las Chapas 5 is a contemporary villa located in Las Chapas, Marbella East, designed across a main level with the addition of a basement level for leisure and entertainment. The layout is centred on open-plan living, with expansive glass sliding doors that connect the interior seamlessly with the outdoor areas. The main living space integrates a lounge, dining, and kitchen area, all finished with clean lines, warm wood accents, and views toward the landscaped garden and pool. The exterior of Chapas 5 is defined by its landscaped gardens, mature palms, and multiple areas for relaxation. The pool, with stepping stones and surrounding sun loungers, is positioned as the central feature of the outdoor space. Additional highlights include a covered dining terrace and a sunken firepit lounge with integrated lighting, creating inviting settings for both daytime and evening use. The overall design ensures privacy while maximising enjoyment of Marbella's climate.
